Our friends of the Sentinel say: After next Menday, the Administration party will have a ticket in the field to be run in next October. The election then. will be an unusually important one, and should not be prejected too long by the Friends of Freedom. A Convention of the Republican party is scarcely sorken of, and time is passing away that ought to be improved. A few months since, when the subject was discussed, a general opinion prevailed, that it would be Letter for the Jevelor ments of the present sessien of Congress to appear, before any nominations should be made. This was well enough; but the indications now are that we shall have nothing new developed this winter, and we might as well call the Convention and prepare for the campaign. A meeting about the first of March, would place our nominations beyond the adjourn. ment of Congress, and yet not give more than proper time for the people to hold primary meetings, elect Delegates, and discuss the merits of candidates for ready naming particular men, though all seem inclined to yield their preferences to any good and true man. Senator CHASE has been spoken of for Governor; and certainly no better choice could well be made. The re-election of Mr. WADE will be an important question also in the election of members to the next Legislature, and some concert on this subject might be profitably looked to at this time. deed we have no time to lose, if we would preserve the advantage of last year's victory. It would be well for the State Central Committee appointed in July last, to see to it, and issue a call at an early day.

HUMANITY IN THE CITY .- We have received a copy of the above new work and read it with real pleasure. It is a series of discourses recently delivered in New York by Rev. E. H. Chapin, upon the following subjects: The Lessons of the Street; Man and Machinery; Strife for Precedence; The Symbols of the Republic; The Springs of Social Life; The Allies of the Tempter: The Children of the Poor; The Help of Religion.

Mr. Chapin has a peculiarly happy style of speaking and writing, and the light of a noble soul illuminates all he says and does. No one can read the book before us without feeling the influence of that magnetic eloquence which has earned for its author a high niche among the orators of America. A tone of pure morality and lofty thought pervades this book which makes one on better terms with human nature by showing how noble may be its aims and aspirations. Those who are not already acquainted with the writings of Mr. C. will find in this excellent volume an opportunity to become so. Those who have either listened to, or read anything of his before will need no urging to buy the book. It contains an elegant steel portrait of the author. One vol. 12 mo,
